- HIGH [https://pro.glo-hub.com/main](#) and [https://www.pro.glo-hub.com/main](#) should resolve to the same URL, but currently do not.
- HIGH [https://pro.glo-hub.com/main](#) The most common keywords of this webpage are not distributed across the important HTML tags! Primary keywords should appear in title tag, meta description and heading tags to help Search Engines to properly identify the topic of this webpage.
- HIGH [https://pro.glo-hub.com/main](#) This website is not using a custom 404 error page! Default 404 pages result in a poor experience - it can mislead users into thinking an entire site is down or broken, greatly increases the chance they leave the website entirely, and looks unprofessional. We recommend to have a custom 404 error page in order to improve the website's user experience by letting users know that only a specific page is missing/broken (and not the entire site), providing them helpful links, the opportunity to report bugs, and potentially track the source of broken links.
- HIGH [https://pro.glo-hub.com/main](#) This webpage is using render-blocking resources! Eliminating render-blocking resources can help this webpage to load significantly faster and will improve the website experience for your visitors.

There is likely no optimal keyword density (Search engine algorithms have evolved beyond keyword density metrics as a significant ranking factor). It can be useful, however, to note which keywords appear most often on your page and if they reflect the intended topic of your page. More importantly, the keywords on your page should appear within natural sounding and grammatically correct copy.
